FEATURES & BENEFITS

OUTSTANDING QUALITY

At Dawn, we want you to have a bathroom you adore.

That's why we are committed to providing products of the highest quality. We use only the finest materials to guarantee outstanding performance.

We carefully fabricate and anodise or PVD finish all our aluminium profiles. We use aluminium because it is light, strong, and requires minimal maintenance. These finishes increase corrosion resistance and product durability, as well as enhancing the material properties and look of the products.

DESIGN

We stand out from the crowd. Through exceptional product design and innovative technology, we've created a collection like no other. Our products are carefully crafted for all bathroom shapes and sizes. Browse the collections to discover wetrooms and enclosures that will work with your space, rounded off with a stylish designer look.

Trident Guard

Trident Guard is a unique hydrophobic coating that is bonded with our toughened safety glass during the manufacturing process.

This invisible water-repellent barrier protects against limescale, soap scum and bacteria build-up for an easier clean and longer-lasting gleam.

All glass featured in the Dawn showering collection are pre-coated with Trident Guard, prolonging the life of these key parts of your bathroom. To find out more about Trident Guard, see page 124.

Designed to withstand day-to-day usage, all Dawn shower enclosures come with toughened safety glass, known as tempered glass, as standard.

This is approximately four times stronger than ordinary glass. Instead of shattering into jagged pieces when broken, tempered glass fractures into small, relatively harmless pieces. This makes it a safe option for a space that sees a lot of activity, such as the bathroom. All glass is strictly tested in accordance with EN 14428.

Our brass colour enclosures and wetrooms use PVD coating technology to achieve a hardwearing surface that is scratch resistant and won't wear off. This is a finish that is applied at an atomic level and designed to last.

Seamless Design

Dawn frameless enclosures offer significant structural integrity, promoting light and accentuating space.

Easy to clean without any worry of build-up along frame edges.

Lifetime Guarantee

All Dawn products offer the ultimate in quality, precision, and craftsmanship, exceeding approved UK and European testing standards. To give you complete peace of mind, all Dawn shower enclosures, walk-in panels, and bath screens are accompanied by a lifetime guarantee. See page 125 or visit our website for full terms and conditions: www.dawnshowering.com

Our black colour enclosures and wetrooms use anodising technology, an electrochemical process in which a metal surface is coated with a water-resistant oxide layer. Anodised metals are resistant to corrosion and rust.

ECO-Friendly

Dawn endeavours to use eco-friendly, sustainable and/or biodegradable packaging and materials wherever possible (or feasible) to do so. DAWN

ECO-FRIENDLY PACKAGING

We all need to take care of the environment. That's why Dawn never uses polystyrene in product packaging.

As climate change continues to impact on our lives, we are taking the steps as a business to operate more sustainably. By using eco-friendly and, wherever possible, biodegradable materials, we are reducing plastic waste and building a greener way of working.

So, you can enjoy the same high quality bathroom products delivered to you in eco-conscious, recyclable packaging that protects both the items you've bought and the planet.

ADDITIONAL INFORMATION

CLEANING & MAINTENANCE

Following the below instructions will ensure you are in keeping with your lifetime guarantee requirements:

- 1. It is important to clean your enclosure/panels/bath screen after each use
- 2. Ensure any residual water is removed after each use
- 3. Do not allow limescale to build up.
- 4. Clean the glass regularly with soapy water.
- 5. Do not use abrasive products on any surface.
- 6. Install your enclosure in a well ventilated area.
- 7. Chrome is vulnerable to acid and alkali attacks. Strong household cleaners, disinfectants, hair dye and denture cleaners may contain acid.
- 8. Bleach is an aggressive alkaline that may also cause permanent damage to chrome fixtures.

The effects the aforementioned substances can vary from black spotting and non-removable streaks to surface pitting.

PRODUCT DETAILS

- Clear and concise installation instructions are included with all Dawn products.
- For fine tuning and a perfect fit, all doors feature micro-adjustable wall profiles to compensate for 'out-of-true' walls.
- Shower trays must be installed perfectly level to avoid any problems when installing the enclosures.
- Water retention is maintained in all products under normal showering conditions. However water directly jetted with pressure at joints, seals or openings can naturally force an exit.
- Only contents covered in this brochure are protected by the Lifetime Guarantee.
- Glass shattering and parts subject to natural wear and tear are not covered by the Lifetime Guarantee.
- All guarantee forms supplied with installation instructions must be completed and returned to Dawn within 30 days to validate the Lifetime Guarantee, otherwise a statutory 12 month guarantee only will apply as default.
- All heights quoted for enclosures and bath screens are from the top of the shower tray or bath.
- The term "chrome" refers to the electroplated finish on metal materials.
- Dawn over-bath products are not designed for baths with stepped or shaped fronts and are unsuitable for integral soap dishes.
- The design rights of all products contained within this brochure are owned by One of One Ltd. All rights reserved.
- For compatibility with steam generators, please contact Dawn customer services for advice on 0330 124 7290.
- Due to the nature of wet room panel products, water integrity cannot be guaranteed. Please consult your installer.
- Images and diagrams used throughout this brochure are for illustrative purposes only.

Professional plumbing practice ensures that a shower head is never installed facing outwards towards the shower enclosure/ door as shown in the diagram. Limitations of design and physics dictate that water will inevitably leave a shower enclosure/ door if large amounts of water are purposely directed at seals or gaps between aluminium and/or glass. If doors swing out into a bathroom and the glass is still wet, water will drip down onto the floor, please ensure floor coverings are suitable for bathrooms and are not affected by water.

TRIDENT GUARD

All glass panels within Dawn products are specially coated in Trident Guard, which is a unique hydrophobic coating bonded with our toughened safety glass during the manufacturing process. This invisible barrier protects against limescale, soap scum and bacteria build-up, making your enclosure easier to clean and minimising the requirement for any vigorous cleaning.

The hydrophobic coating increases the contact angle of the glass and weakens the surface bonding between the glass and any water droplets. This causes water droplets to sit further away from the glass surface, allowing them to run off with ease.

STANDARD UNCOATED GLASS

Uncoated glass has a shallow contact angle that allows water droplets to sit closer to the glass, spreading the droplet surface area and making it more difficult for gravity to pull them down.

TRIDENT GUARD

allows water droplets, dirt and debris to run off the glass surface. This reduces water concentration on the glass, preventing streaking and spotting and making the glass incredibly easy to clean.

SAFETY ASSURANCE

Dawn shower enclosures (when installed in accordance with the manufacturer's installation instructions) ensure safe performance when used as intended and have been rigorously tested to fully conform to the scope and specified characteristics of BS EN 14428:2015+A1:2018 (Shower Enclosures - Functional Requirements and Test Methods). As a result of full compliance, Dawn shower enclosures carry the 'CE' mark, indicating that all Dawn shower enclosures conform to all essential requirements of European health safety and environmental protection legislation.

TOUGH GLASS

- All Dawn enclosures and bath screens are manufactured using toughened safety glass (stated as Tough Glass) that complies with BS EN 12150.
- Providing products are installed in line with Dawn guidelines and general good practice, Dawn's 'Tough Glass' is completely safe for use in shower enclosures and bath screens;
- IMPORTANT: The glass must not be mounted or 'pinched' in such a way that would cause a stress point to develop in the glass.
- IMPORTANT: Glass must not be subjected to sharp impact or severe fluctuation in temperature as this may also cause a stress point to develop in the glass
- Dawn's 'Tough Glass' is tempered, making it significantly stronger than standard glass both physically and thermally against direct impact. However, significant impact or stress (outlined above) can still cause the glass to break.
- In the event of breakage or shattering, 'Tough Glass' will break safely into small fragments (rather than larger, sharper shards, which can be more harmful). This breakage is in line with all relevant safety standards.

LIFETIME GUARANTEE

One of One Ltd offers a lifetime guarantee on shower enclosures manufactured or imported by **2. Conditions and Exclusions** One of One and sold through a One of One-authorised dealer. This is given to consumers in addition to statutory rights applicable in the United Kingdom and in the Republic of Ireland. LIFETIME GUARANTEE

1. Life Guarantee Provisions

1.1 One of One guarantees its shower enclosures sold under the Dawn brand to consumers who purchase from a One of One-authorised dealer for the period of the product's natural life. There are conditions attached to the lifetime guarantee, and some exclusions from it that are set out in Conditions and Exclusions.

1.2 To obtain the benefit of the lifetime guarantee you must follow the registration procedure on the Dawn website 2.2 Examples that may affect the performance and life expectancy of Dawn shower enclosures and www.dawnshowering.com/guarantee. You must register within 28 days of the date of purchase. You are only entitled to register if you are the original purchaser of a Dawn shower enclosure. Upon registration you will be asked to provide proof of purchase.

1.3 The product must be visually inspected for defects within 7 days of the date of purchase, to avoid a replacement delivery charge. In any event, physical defects should be reported prior to installation. Installation would be treated as acceptance of the product quality.

1.4 If a Dawn shower enclosure is defective in materials or manufacture, the consumer should first contact their One of One-approved retailer to report a defect. They will advise further or contact a One of One customer service advisor. If the fault is not resolved, One of One may choose to repay the cost of the product, offer to send replacement parts, or a full replacement product will be provided. This will constitute our sole obligation under this

1.5 The lifetime guarantee covers normal domestic use of a Dawn shower enclosure under normal water

1.6 One of One reserves the right to develop and improve its enclosures continuously. This may mean changes to specifications. If under the lifetime guarantee identical parts or an identical shower enclosure is no longer be available, One of One will supply the nearest current equivalent.

1.7 The guarantee does not cover ex-display units.

1.8 The guarantee is in addition to your statutory rights. It does not affect your statutory rights in any way.

2.1 The lifetime guarantee does not cover:

- Damage caused by wilful damage, neglect, misuse, accidental breakage and fair wear and tear.
- Breakage of, or damage to, the glass or its coating (unless the defect is present at the time of purchase).
- Showering items, specifically the valves, hand sprays and fixed heads, body jets, drench heads, shower valves, and items of a similar nature.
- Items that are not part of the shower enclosure, including soap dispensers, towel rails, shower trays and similar items.

are excluded from the provisions of the lifetime guarantee. These include:

- Failure to adhere to Dawn fitting and cleaning instructions.
- Water composition, as hard water may cause water staining
- Exposure to sunlight, which may cause colours to fade and certain products to warp.
- Galvanic corrosion most commonly caused by failing to allow adequate drainage of the enclosure framework.

2.3 The lifetime guarantee for metal coverings against flaking, discolouration, and rust is excluded when these conditions are caused by:

- Misuse
- Build-up of mildew and limescale
- The use of corrosive liquids or cleaners

2.4 Moving parts, ABS, rubber or plastic parts used in Dawn shower enclosures are excluded from the lifetime guarantee.

These products have a 12-month guarantee but only where:

- They have been reasonably maintained and cleaned
- Failure is as a result of normal wear and tear.

CUSTOMER SERVICES

Our dedicated Dawn customer service team can be contacted on 0330 124 6603 (9am - 5pm, Monday - Friday). Alternatively you can email your enquiry to sales@1of1bathrooms.co.uk
